

CE 201
 STATICS

Last H.W.

Do the HW **before** the final exam and **before** you see the key solution, but it is *not to be submitted*.

- 1) For the area shown in Fig. P1, determine I_x and I_y .
- 2) Determine the moments of inertia \bar{I}_x and \bar{I}_y of the area shown in Fig. P2 with respect to the centroidal axes which are parallel and perpendicular to the side AB.
- 3) For the area shown in Fig. P2, determine the moment of inertia about axis AB. Do **not** use any of the results obtained in problem 2. Compare the solution steps of this problem with the steps of problem 2 and discuss.
- 4) In the area shown in Fig. P4, set $a = 30$ mm. Determine I_x and I_y .
- 5) For the area shown in Fig. P5, determine the moments of inertia with respect to the horizontal and vertical centroidal axes.
