

TECHNICAL SEMINAR

TITLE: **BOT Project Delivery System In Saudi Arabia**

PRESENTER: **Mohammed Jalaluddin**
KFUPM

LOCATION: **Jubail Intercontinental Hotel**

DATE: **Wednesday, May 14, 2003**

TIME: **5:00 P.M.**

SYNOPSIS: In Saudi Arabia, financing of large-scale investment projects such as power generation, water desalination, transportation etc has been predominantly undertaken by the Government. But owing to the huge demand for developing new infrastructure, private sector participation in the development and operation of infrastructure is now seen as a common and accepted concept. It is estimated that around US \$ 250 billion will be needed over the next 2 decades to meet existing demand. This presentation explores the applicability and feasibility of BOT delivery method in Saudi Arabia.

NOTE: This presentation was developed from the presenter's research work done as part of his Master thesis requirement. **A "Recertification Clinic" will also be held, by the Board members, for members interested in retaining their recertification.**

Information & Reservation: Seating is limited and will be on first come basis. To reserve, please send you name and company information to the persons below latest by 10th May 2003 9.30 AM.
