*Abstract*— **In this paper various speech issues will be discussed. These issues are enhanced in a computing ethics approach. Three main concerns are going to be emphasized here namely: Misinformation, Netiquette and Chain letters.**

*Index Terms*—**Misinformation, Netiquette and Chain letters**

## I. INTRODUCTION

Speeches are a fundamental part of any professional engineer. That undertakes its importance and significance in any field, especially in the communication thru the international network. Therefore, we are going to describe some issues in the speeches. These include electronically values and ethical conducts, not only in the normal fashion way of face-to-face speech but also in the network interaction and its good manners.

In the professional world, the behavioral issues of any individual matters, specifically in the computing world. Hence we are going to discuss three major speech issues that will relate to information mistaken. Then, we briefly argue about the Etiquette of using the internet. Lastly, our paper is ended by describing the chain letters.

## II. MISINFORMATION

Misinformation takes place by publishing wrong or biased information on the internet. The freedom of the online publishing by any user has increases the faulty and low quality resources throughout the World Wide Web. Hence, that will make the internet an unreliable source of information. In addition, the job of searching the electronic magazines, newsletters, journals, encyclopedias and E-books, must include filtering and use of inelegance ways to reach the complete truthful information without any propaganda.

Misinformation can cause serious damages since many people rely on the internet web sites in major fields such as

health and business .As an example of misinformation is getting a wrong medical advice can simply lead to serious injury or death  as well as erroneous business consultation can result in financial ruin or backrubs[1].

## III. NETIQUETTE

Network Etiquette (Netiquette) is a term for the conventions of politeness and respect recognized on various internet conversation resources, such as: Internet message boards or instant live chat [2]. The Netiquette become necessary and it addresses some issues in online conversation like the use of abbreviation in E-mailing or chatting. These abbreviations include:  BTW (by the way), FYI (for your information) and BCNU (be seeing you), etc. There are rules of the Netiquette that reflect the behavior of the user and with them a nice polite interaction can be ensured [4]. Here is a list of the rules specified in the Netiquette:

1- Keep messages and replies brief. *Reducing the size of the messages will make it easer to the other party to comprehend the massage fully without annoying him.*

2- Make the subject line relevant to the message content. *In mailing, the title should specify the core of the message briefly and to- the- point.*

3- Conclude each e-mail message with a signature file and Contact information.

4- If you use a graphic or a bit map of your signature in Your signature file makes sure it's small,

5- To ensure your readers understand you're being funny or Serious in your writing, use emoticons. E.g.:

:-) Smiley face
;-) Wink
:-D Shock or surprise
:-I Perplexed
:-( Frown
:-P Wry smile
;-) Leer
:-e Disappointment
:-@ Scream[3]

## IV. CHAIN LETTERS

The chain letter consists of a message that attempts to make the recipient to create a number of copies of the letter and then pass them on to one or more new recipients. Chain letters are

illegal. Net sites which do not discourage electronic chain letters risk losing their net connections, as they have the potential for wasting great amounts of bandwidth and disk space. A chain letter can be used to fake emotionally manipulative stories for example, get-rich-quick scheme or threatening messages [2].

## V. CONCLUSION

We have discussed here three major issues of speeches. we started with the clarification of misinformation and its negative influences. Next, we discussed the Etiquette of using the network to conduct a conversation politely and nicely. At the end, we concluded our paper by saying a diminutive talk about chain letters and its damage to the network providers.
