

COE 205 Lab

Experiment 5

Assignment

Write a program that reads 2 4-digit-numbers (A and B) from the keyboard. The program performs then the division of A by B.

1. Display the quotient (result of the division of A by B) and the remainder.
2. The program asks the user to enter a 1-digit number (p). The program will then display the decimal result of the division (including the decimal point) with p digits after the decimal point.

Next Week:

1. Assignment Exp. 4: Addition of two matrices
2. Lab Exp. 5: Read two 4-digit numbers and add them then display the result
3. Assignment Exp. 5: This assignment !
