[Message 39 from Ahmad Hamoud Dehwah in course COE 449-01, Network Security Engineering]

Dear Dr. Adnan,

Thanks a lot for your efforts, I really enjoy taking the course with you and it was all a new topic for me "Networking Security". So, I feel that it is a helpful course for me.

Honestly, what I like the most about this course is the kind way that you treat us and you keep doing your best such that we won't have any conflicts with other majors and other quizzes.

Wish you all the best,  
Ahmad Dehwah
