

In all the report, the reference number at the end of sentences should be before the full stop ending the sentences. Example: ‘message. [2] Literally’ è ‘message [2]. Literally’

3. Previous work: ‘[1] discusses three’ è ‘Neil Johnson et al. [1] discussed three’

Not clear to understand, need reconsideration or rephrasing: ‘which reconstructs the original message exactly (lossless compression) to a JPEG which does not (lossy compression) and then back could destroy the information hidden in the LSBs.’

‘[2] analyzes and evaluates seven different....Steo1bit...’ è ‘Kevin Curran and Karen Bailey [2] analyze and evaluate seven different Stego1bit...’

‘[5] & [6] also’ è ‘The literature [5] & [6] also....’ Add a sentence or two showing the ideas of the work in [5] & [6], then indicate a relation with your proposal or state clearly that it is out of the focus of your work.

Presentation Comments:

Slide 4 needs example figures of previous work.

Slide 5 need some illustration for every point.

Slide 6 show also the cover file and the bits to be hidden

Slide 7 show the hidden bits that are embedded into the cover image.
