

**Your Project has been submitted to the course coordinator. The project will be checked and posted as soon as possible.**

**Thank you**

Advisor Name1	Abu-Amara, Marwan H.
Advisor Name2	None
Advisor Name3	None
Coordinator Name	EIRabaa, M.E.S.
Project Code	WHC-T041
Project Title	Wireless Home Controller
Project Description	Wireless Home Controller (WHC) is a microcontroller system that accepts instructions for a desired functionality (turning on/off AC, turning on/off light, locking doors & windows, turning on/off security system, ...) sent by a mobile user, and perform the desired functionality and provide feedback to the mobile user.
Project Prerequisite	GPA of 3.5 and above, microcontroller, high level programing
Project Deliverable 1	Proposal showing a full description of the project and its objective
Project Deliverable 2	Full project plan
Project Deliverable 3	A preliminary system design
Project Deliverable 4	A list of responsibilities of each of the team members
Project Deliverable 5	A working prototype
Number of Students	2
Number of Semesters	1
