

**CSE 552 – Network Management
Fall 2006 (Term 061)**

Assignment 4

Date: Tuesday, December 12, 2006

Paper Review and Discussion

Due date: Saturday, December 16, 2006

Paper: “A Hierarchical Architecture for a Distributed Management of P2P

Networks and Services”, by G. Doyen, E. Nataf, and O. Festor. In J. Schönwälder and J. Serrat, editors, Proceedings of the 16th IFIP/IEEE International Workshop on Distributed Systems: Operations and Management - DSOM'05, number 3775 in LNCS, pages 257-268. Springer-Verlag, 2005.

Review: The paper review must be submitted by email to the instructor before Saturday, December 16, 2006 at 12:00PM. Your review should be less than 800 words and “should encompass two major components: a summary of the work and an opinion of its contribution and significance to the field” as stated by ACM computing reviews. See <http://www.reviews.com/Reviewer/Rev-info.html> for more information.

Discussion: A discussion of the paper will be held on Saturday, December 16, 2006 in class.

Late submission policy:

Reviews submitted after the due date will have 10% of the assignment maximum grade subtracted for every late day. If the submission is one week late, the grade for the assignment will be 0. (e.g.; if you get a grade of 80% in one assignment submitted 2 days later than the due date, you'll only receive a grade of 60%).
