

Announcing the Availability of a Funded Research Project

# For Masters Students

During the year 2010-2012

The project is aimed to come up with a hardware implementation for a compressive sensing system using wired and wireless sensor schemes.

Basic background in hardware design, electronics and embedded systems (as well as C language programming) is a must.

For more information about the project, contact:

**Dr. Mohammad S. Sharawi**, Building 59, Room 1091, Ext: 4810.
