

## Contents

<b>Ibrahim Abu-Alshaikh and Mehmet Emir Koksal</b> , One-dimensional transient dynamic response of functionally graded spherical multilayered media	1
<b>M. Z. Aissaoui</b> , Asymptotic behavior of the solution, when $t \rightarrow \infty$ , of a class of nonlinear equations, and associated spectral varieties	21
<b>H. Akça, R. Alassar, Y. M. Shebadeh and V. Covachev</b> , Neural networks: modelling with impulsive differential equations	32
<b>M. Akhmet, J. Alzabut and A. Zafer</b> , On functionally equivalent impulsive delay differential equations	48
<b>João F. Alves, Henrique Oliveira and J. Sousa Ramos</b> , Topological entropy of the tangent map	56
<b>J. F. Alves and J. Sousa Ramos</b> , Artin-Mazur zeta function on trees with infinite edges	65
<b>Shaban Aly and M. Farkas</b> , Interaction of species in patchy environment with cross diffusion	74
<b>F. Ammar-Khodja, S. Kerbal and A. Soufyane</b> , The uniform stabilization of the nonuniform Timoshenko beam	87
<b>A. Ashyralyev, G. Judakova and P. E. Sobolevskii</b> , On difference schemes for hyperbolic-elliptic equations	90
<b>A. Ashyralyev and N. Yenial-Altay</b> , Positivity of difference operators generated by the nonlocal boundary conditions	113
<b>A. Ashyralyev and H. A. Yurtsever</b> , On difference schemes for hyperbolic-parabolic equations	136
<b>N. Azbelev and P. Simonov</b> , Contemporary theory of functional differential equations and some classical problems	154
<b>Alina Barbulescu and Vasile Marza</b> , Some models for the voltage induced in a liquid by cavitation	158
<b>Mohammed Boucekif and Yasmina Nasri</b> , On nonhomogeneous elliptic system with changing sign data	166

<b>Abdelkader Boucherif and Nawal Al-Malki</b> , Nonlinear second order periodic boundary value problems	178
<b>S. M. Bouguima and S. Fekih</b> , Multiplicity results for an elliptic system	189
<b>N. Boussetila and F. Rebbani</b> , The modified quasi-reversibility method for an abstract ill-posed ultraparabolic problem	193
<b>Jan Čermák</b> , Asymptotic properties of differential systems with unbounded delays	195
<b>D. Cheban and C. Mammama</b> , Relation between different types of stabilities of linear nonautonomous dynamical systems	205
<b>Sui Sun Cheng</b> , Smooth solutions of iterative FDEs	228
<b>V. B. Cherepennikov</b> , Variation inverse initial value problem for linear systems of differential-difference equations of neutral type	253
<b>Y. J. Cho, G. T. Guo and H. Y. Zhou</b> , Approximating fixed points of asymptotically quasi-nonexpansive mappings by the iterative sequences with errors	262
<b>Nicolae Costea and Cristian Stefan Dumitriu</b> , Considerations on the study of the errors in the mathematical model of the lag propagation	273
<b>Valéry Covachev, Haydar Akça and Yaqoub Mustafa Shebadeh</b> , Periodic solutions of the discrete counterpart of an impulsive system with a small delay	282
<b>İdris Dağ, Bülent Saka and Ahmet Boz</b> , Quintic B-spline Galerkin methods for numerical solutions of the Burgers' equation	295
<b>Ali Djellit and Nawel Benouhiba</b> , Asymptotic estimates for the eigenvalues of some nonlinear elliptic problems	310
<b>Ilhem Djellit and Ibtissem Boukemara</b> , Bifurcations and attractors in Bogdanov map	323
<b>A. A. Dosiyevev and S. Cival</b> , A difference-analytical method for solving Laplace's boundary value problem with singularities	339
<b>Zuzana Došlá and Aleš Kobza</b> , Oscillatory solutions of third order nonlinear difference equations	361

<b>Ondřej Došlý</b> , The Bohl transformation and its applications	371
<b>M. Ebrahimi</b> , Generators of probability dynamical systems	386
<b>H. Hein and Ü. Lepik</b> , On stochastic response of nonlinear oscillators	395
<b>Ivan Ganchev Ivanov</b> , Properties of solutions of matrix equation $X + A^*X^{-2^k}A = Q$	408
<b>M. R. Jabbarzadeh</b> , Substitution operators between measurable function spaces	419
<b>M. Jahanshahi, N. Aliev and H. R. Khatami</b> , An analytic-numerical method for solving difference equations with variable coefficients by discrete multiplicative integration	425
<b>M. Karami</b> , Solving integral equations by Petrov-Galerkin method and using Hermite-type 3 – 1 elements	436
<b>B. Kendirli</b> , Decomposition of prime ideals in the extensions	443
<b>F. Khadem and F. A. Ghasemi</b> , Using Lagrange-type $k - 0$ elements for solving Fredholm integral equations of the second kind	450
<b>H. R. Khatami, M. Jahanshahi and N. Aliev</b> , An analytical method for some nonlinear difference equations by discrete multiplicative differentiation	455
<b>A. Khelassi, J. A. Wilson and R. Bendib</b> , Assessment of interaction in process control systems	463
<b>Brahim Khodja</b> Nonexistence of solutions for semilinear equations and systems in cylindrical domains	472
<b>Maria K. Koleva and Valéry C. Covachev</b> , The Lyapunov exponent and the long-term stability of the natural systems	485
<b>Ülo Lepik and Enn Tamme</b> , Application of the Haar wavelets for solution of linear integral equations	494
<b>Carmen Maftei and Alina Barbulescu</b> , Program for the management of the pluviometrical and limnimetrical data	508
<b>K. Maleknejad</b> , Solving integral equations of the second kind by using wavelet basis in the PG method	515

<b>S. Mazouzi and N. Ferfar</b> , Improved results regarding some multidimensional reaction-diffusion systems	521
<b>Hocine Meglouli</b> , Reliable measurement and influence of measurement errors on the balance algorithm of physical parameters (application on a rectification vacuum column)	532
<b>M. Nadir</b> , Endpoint values of wavelets on an interval	538
<b>M. Nadir</b> , On the approximation of singular integrals of Cauchy type	547
<b>Saadet Özer and Ali Ercengiz</b> , Effect of the thickness of tube on wave propagation in elastic tubes filled with viscous fluid	553
<b>Sandra Pinelas</b> , Nonoscillations in retarded equations	563
<b>Necat Polat, Doğan Kaya and H. İlhan Tutalar</b> , Blow up of solutions for a class of nonlinear wave equations	572
<b>E. Pourreza</b> , Boundedness of weighted composition operators between two different $L^p$ spaces	577
<b>I. Rahimov</b> , On the number of large families in a branching population	582
<b>J. Leonel Rocha and J. Sousa Ramos</b> , Computing topological and metrical invariants	598
<b>Alexandra Rodkina and Gregory Berkolaiko</b> , On asymptotic behavior of solutions to linear discrete stochastic equation	614
<b>Gergely Röst</b> , Some applications of bifurcation formulae to the period map of delay differential equations	624
<b>M. Shahrezaee</b> , Solving an integro-differential equation by Legendre polynomial and block-pulse functions	642
<b>O. Cherikh Sisaber and R. Bebbouchi</b> , On a singularly perturbed Liénard system with three equilibrium points	648
<b>Muhammed I. Syam</b> , The modified adaptive quadrature method for line integrals	652
<b>Tadié</b> , Comparison results for quasilinear elliptic equations via Picone-type identity	660
