STAT-211-Term043-Quiz #5

Name: _____

ID: _____

Serial: _____

Question One (5-Points)

Write **True** if the statement is true or **False** if not:

1. The probability of success in the hypergeometric distribution may change during trials: **True**
2. The mean and the standard deviation of a Poisson random variable are equal: **False**
3. Trials in the binomial distribution are dependent: **False**
4. The values of any normal distribution extends from $\mu - 3\sigma$ to $\mu + 3\sigma$: **False**
5. In the uniform distribution intervals of equal length may not have the same probability: **False**

Question Two (5-Points)

1. If the ratio of defective items in a shipment is 20%, a sample of size five is taken randomly with replacement, then the probability of at least one defective item is:

- a. 0.32768 **b. 0.67232** c. 0.5904 d. 0.4096

2. The number of a customers in a certain bank follow a Poisson distribution with an average of five customers per hour, then the probability of three customers in 30 minutes is:

- a. 0.8596 b. 0.1404 **c. 0.2138** d. 0.7862

3. In a certain group there are 5 management, 4 finance, and 3 economic students, if a sample of size 3 is randomly taken without replacement, then the probability that there are one from each topic is :

- a. $\frac{7}{11}$ b. $\frac{1}{22}$ c. $\frac{2}{11}$ **d. $\frac{3}{11}$**

4. The yearly incomes for a group of 20,000 professional people is normally distributed with mean $\mu = \$60,000$ and standard deviation $\sigma = \$5000$. Then the number of these people have a yearly income over \$70,000 is:

- a. 912 b. 10228 c. 228 **d. 456**

5. If X is uniformly distributed over the interval $[-2, 3]$, the $P(X \leq 0)$ is :

- a. 0.6 **b. 0.4** c. -0.4 d. 0
-

NOTE: you may use One of the following areas, where

z_0	0.2	0.5	1.5	2.0	2.2	2.25
$P(0 < Z < z_0)$	0.0793	0.1915	0.4332	0.4772	0.4861	0.4878
