Q.1: Use Stokes' theorem to evaluate the integral $\oint_C F \cdot dr$, where $F = y^3 \mathbf{i} - x^3 \mathbf{j} + z^3 \mathbf{k}$ and C is the trace of the cylinder $x^2 + y^2 = 16$ in the plane 2x + y + 2z = 1.

Q.2: Use Divergence theorem to evaluate the integral $\iint_S (F \cdot n) dS$, where $F = \frac{x \mathbf{i} + y \mathbf{j} + z \mathbf{k}}{x^2 + y^2 + z^2}$ and D is the region bounded by $x^2 + y^2 + z^2 = 4$ and $x^2 + y^2 + z^2 = 9$.
