# COE 202, Term 162 <br> Fundamentals of Computer Engineering 

## Quiz\# 2

Date: Sunday, March 5

Q1. Using algebraic manipulation, simplify the following functions into minimum number of literals in sum-of-product form:
a. $\quad F(A, B, C)=A B^{\prime} C+B^{\prime} C^{\prime}+A B^{\prime} C^{\prime}+A^{\prime} C^{\prime}$
b. $\quad F(X, Y, W, Z)=Y+X^{\prime} Y^{\prime} W Z+Y^{\prime} W Z+X^{\prime} Y W Z^{\prime}+Y^{\prime} W W^{\prime} Z+X Y W Z^{\prime}$

Q2. Find the complement of the following function without any simplification:

$$
F=(X Y+Z) \cdot W^{\prime}+E D^{\prime}
$$

Q3. Consider the following function:

$$
F=X Y+\left(X^{\prime}+Z\right)\left(Y+Z^{\prime}\right)
$$

a. Express F as a sum of minterms using $\mathrm{F}=\sum \mathrm{m}()$ notation.
b. Express F as an algebraic sum of minterms.
c. Express F as a product of maxterms using $\mathrm{F}=\Pi \mathrm{M}()$ notation.
