# COE 200, Term 993 <br> Fundamentals of Computer Engineering <br> Quiz\# 2 

Date: Sunday, June 25
Q.1. Prove the identity of each of the following Boolean functions using algebraic manipulation:
a.

$$
\mathrm{AB}+\mathrm{A}^{`} \mathrm{C}+\mathrm{BCD}=\mathrm{AB}+\mathrm{A}^{`} \mathrm{C}
$$

b.

$$
A B^{`}+B^{`} C^{`} D^{`}+A^{`} B ` D+A^{`} B^{`} C=B `
$$

Q.2. Consider the following Boolean function $\mathrm{F}(\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{D})=\mathrm{BC}+\mathrm{AC}+\mathrm{AB}+\mathrm{BCD}$ :
a. Reduce the function into four literals using algebraic manipulation.
b. Express the function in a sum of minterms and a product of maxterms.
c. Find the dual and the complement of the reduced function.
