ELECTRICAL ENGINEERING DEPARTMENT

EE 242 Digital Communications and Coding (Fall 2009)

Project & Presentation Evaluation

The project weight is 13% out of the total final mark. Part of that will come from the project presentation and part from the written report as follows:

Presentation: 5 %
Report: 8 %

Report

The report should be well structured. It should at least contain the following parts:

1. Cover Page
2. Abstract
3. Introduction
4. Body
5. Conclusion
6. References

The body and introduction might themselves be divided further if need be. The following points will be considered in evaluating the report

1. Coherence (readability and flow of the report)
2. Organization
3. Were essential equations derived?
4. Were the equations copied and pasted or were they actually typed.
5. Did the report contain additional insights?
6. Did the report contain MATLAB simulations?
7. Was the report submitted in time (in hard and soft copies)?

Presentation

The presentation should be 20 minutes long (15 minutes for the presentation and 5 minutes for Q&A). The presentation will be evaluated based on the following

1. Clarity
2. Presentably of Slides
3. Were the slides E-mailed on time?
4. Were the questions answered correctly?
5. Was the presentation finished on time?

There are a total of 12 presentations. They will be divided into a group of 6 presentations each (groups will be announced later on)

Group 1: Sat. Dec. 12, 3:00 PM- 5:00 PM
Group 2: Sat. Dec. 12, 7:00 PM- 9:00 PM

You are expected to attend ALL presentations of your group for two reasons:

1) The material covered in the presentations is part of the learning you get for this course
2) You will participate in evaluating the presentations of other members
