

**Assignment#5**

Write a comprehensive report for our visit to RT lab. It may cover the functions of RT lab and the applications of SPC techniques therein. You may also provide some suggestions based on your vision about SPC tools.

**Assignment#6**

What are ISO and ASTM standards and how they differ from each other? Provide a separate list of ISO and ASTM standards on quality control in general and control charts in particular. Also write a brief description of each of these standards.

**Expected Time for Submission: April 30, 2015.**
