

Q1. Evaluate the limits

i.  $\lim_{x \rightarrow 0} \frac{x}{\tan^{-1}(2x)}$

ii.  $\lim_{x \rightarrow \infty} (x^2 + 1)^{\frac{1}{\ln x}}$

Q2. Sketch a graph of a function that satisfies the given conditions.

$$\begin{cases} f(x) \text{ is continuous on } (-\infty, \infty) \\ f'(x) < 0 \text{ on } (-\infty, 2) \\ f'(x) > 0 \text{ on } (2, \infty) \\ f''(x) < 0 \text{ on } (-\infty, 2) \text{ and } (2, \infty) \end{cases}$$
