Quiz (1)

Name	ID	SEC	Sr
------	----	-----	----

Q1) Show that $y = \frac{c}{e^{-x} + c}$ is a family of solutions of the DE

$$\frac{dy}{dx} = y(1 - y).$$

Q2) show whether or not the initial value problem

$$x \frac{dy}{dx} - 2y = 0, y(0) = 0$$

has a unique solution.

Q3) Solve the IVP

$$\frac{dy}{dx} = \frac{x y + 3 x - y - 3}{x y - 2 x + 4 y - 8}, \quad y(0) = 1$$

Q4) solve the ODE: $y^2 dx + (3xy - 1) dy = 0$
