How to Make Presentation

• Introduce yourself, your topic of presentation via a cover page that should include
  – Title of the presentation
  – Your name
  – Your partner if any
  – Your advisor name

• Give outlines of the presentation indicating the sequence or parts of your presentation.

• You should introduce the topic through introduction

• You should brief the previous work (short literature/market survey)

• After that you should draw attention to the need to your work based on what you reviewed and highlight the importance of your work.
How to Make Presentation \textit{cont’d}

- Outline the objectives of your work.
- The approach of solutions
- Discuss the important obtained results
- Summarize conclusions and findings
- Recommend future work if possible
- Thank the audience, your advisors and colleagues
- Try to make simple, short and clear sentences.
- Do not have a crowded presentation slides.
How to Make Presentation cont’d

• Use pictures, figures and tables as much as possible.

• Try to establish eye contact with the audience to get their attention and to show your confidence in yourself.

• Do not read from papers. Read directly from the screen if you forget something.

• Try to remember your presentation by practicing it more than once alone and in front of your colleagues and advisor.
