## COE 202: Fundamentals of Computer Engineering (071)

## Assignment 2

1. Prove the identity of each of the following Boolean equations, using algebraic manipulation:
(a) $\mathrm{Y}+\mathrm{X}^{\prime} \mathrm{Z}+X Y^{\prime}=\mathrm{X}+\mathrm{Y}+\mathrm{Z}$
(b) $X^{\prime} Y^{\prime}+Y^{\prime} Z+X Z+X Y+Y Z{ }^{\prime}=X^{\prime} Y^{\prime}+X Z+Y Z '$
2. Simplify the following Boolean expressions to expressions containing a minimum number of literals:
(a) $\mathrm{A}^{\prime} \mathrm{C}^{\prime}+\mathrm{A}^{\prime} \mathrm{BC}+\mathrm{B}^{\prime} \mathrm{C}$
(b) $\mathrm{BC}+\mathrm{B}\left(\mathrm{AD}+\mathrm{C}^{\prime} \mathrm{D}\right)$
3. Find the complement of the following expression:

$$
\left(A+B^{\prime}+C\right)\left(A^{\prime} B^{\prime}+C\right)\left(A+B^{\prime} C^{\prime}\right)
$$

4. Obtain the truth table of the following functions, and express each function in sum-ofminterms and product-of-maxterms form:
WXY' + WXZ' +WXZ+YZ
5. Optimize the following expression in (1) sum-of-products and (2) product-of-sums forms:

$$
\left(\mathrm{A}^{\prime}+\mathrm{B}^{\prime}+\mathrm{D}\right)\left(\mathrm{A}^{\prime}+\mathrm{D}^{\prime}\right)\left(\mathrm{A}+\mathrm{B}+\mathrm{D}^{\prime}\right)\left(\mathrm{A}+\mathrm{B}^{\prime}+\mathrm{C}+\mathrm{D}\right)
$$

6. Optimize the following Boolean function F together with the don't-care condition d :

$$
\mathrm{F}(\mathrm{~W}, \mathrm{X}, \mathrm{Y}, \mathrm{Z})=\Sigma \mathrm{m}(0,6,8,13,14), \mathrm{d}(\mathrm{~W}, \mathrm{X}, \mathrm{Y}, \mathrm{Z})=\Sigma \mathrm{m}(2,4,7,10,12)
$$
