## EE 315 - Fall 2011(111)

Quiz 1

| SER | ID | NAME KEY |
| :--- | :--- | :--- |

Two Boxes with numerical balls as follows:
$A=\{1,2,3,4\} \quad B=\{1,2,3,4,5\}$
A box is selected at random with probabilities :

$$
\mathrm{P}(\mathrm{~A})=\frac{1}{3} \quad \mathrm{P}(\mathrm{~B})=\frac{2}{3}
$$

If a ball is selected randomly from the box that was selected and the balls are equal likely. Find the followings :
(a) $\mathrm{P}(1 \mid \mathrm{A})$ ?
(b) $\mathrm{P}(1)$ ?
(c) $\mathrm{P}(A \mid 1)$ ?
(d) $\mathrm{P}(5)$ ?

## Solution

(a) $\mathrm{P}(1 \mid \mathrm{A})=\frac{1}{4}$
(b) $\mathrm{P}(1)=\mathrm{P}(1 \mid \mathrm{A}) \mathrm{P}(\mathrm{A})+\mathrm{P}(1 \mid \mathrm{B}) \mathrm{P}(\mathrm{B})$
$=\left(\frac{1}{4}\right)\left(\frac{1}{3}\right)+\left(\frac{1}{5}\right)\left(\frac{2}{3}\right)=\frac{13}{60}$
(c) $\mathrm{P}(A \mid 1)=\frac{\mathrm{P}(A \cap 1)}{\mathrm{P}(1)}=\frac{\mathrm{P}(1 \mid \mathrm{A}) \mathrm{P}(\mathrm{A})}{\mathrm{P}(1)}=\frac{\left(\frac{1}{4}\right)\left(\frac{1}{3}\right)}{\frac{13}{60}}=\frac{5}{13}$
(d) $\mathrm{P}(5)=\mathrm{P}(5 \mid \mathrm{A}) \mathrm{P}(\mathrm{A})+\mathrm{P}(5 \mid \mathrm{B}) \mathrm{P}(\mathrm{B})$

$$
=(0)\left(\frac{1}{3}\right)+\left(\frac{1}{5}\right)\left(\frac{2}{3}\right)=\frac{2}{15}
$$
