

Water & Wastewater Treatment Projects

- The potential for water saving in the K.S.A. using hydrobond polymers.
- Determining the levels of chlorination by-products (THMs and other organic pollutants) in Saudi Arabian drinking waters.
- Remediation of Contaminated Groundwater Using Advanced Oxidation Technology.
- Assessing and Evaluation of the wastewater treatment facilities at the Arabian Oil Co. (AOC) in Al-Khafji City, Saudi Arabia.
- Evaluating a dissolved Air flotation (DAF) system for the treatment of an API oily wastewater effluent.
- Application of Photo-Oxidation Process of the Removal of MTBE in the Presence of H₂O₂.
