King Fahd University of Petroleum & Minerals

College of Computer Science and Engineering

SWE 444 - Internet and Web Applications Development

Homework Assignment # 1 [Due Date: October 29, 2008 before 10:00pm]

Using HTML language only and a plain text editor such as notepad (but not HTML or GUI editors), create a website for yourself that at minimum satisfies the following requirements:

- ◦ It should include different HTML elements e.g. headings, paragraphs, lists, images, text hyperlinks, image hyperlinks, bookmarks, image maps, tables, text formatting, forms, etc.

- ◦ It should include appropriate and rich content such as a short biography, education and training courses, projects that you have a major role in it, summer training, skills, favorites and useful web links, photo gallery, contacts, etc.

- ◦ Be consistent in all styles and make user friendly with some appealing layout

- ◦ Publish it at your university account. For information about how to host your website at your KFUPM account, refer to http://student.kfupm.edu.sa/ and the PPT slides that you can download from the course website

Submission Guidelines:

1. Zip all the htm files under the name YourID-hw1.ZIP and submit through WebCT
2. Update your profile in WebCT to include a link to your home page
