

Opera 9.6 Making you faster

Features

- ▶ Opera browser is full of features that I will not even mention it since it is a main thing like
- ▶ Efficiency
- ▶ Speed
- ▶ Reliability
- ▶ ...

Opera Link

Opera lets you synchronize every part of your life. Synch your Speed Dial, Bookmarks, Custom Searches, History and Notes between your work and home computer; take your bookmarks with you on your phone.

Quick Find

- ▶ Have you ever forgotten the page where you found that great article or that perfect gift? When using Opera the browser remembers not only the titles and addresses, but the actual content of the Web pages you visit.

Mouse Gestures

- ▶ With Opera you can navigate the Web with your mouse. A mouse gesture is performed while clicking and holding the right mouse button and moving the mouse in an easy pattern. Perform movements with the mouse to access well-known features like “Back”, “Forward” and “Open new tab”. Like Opera's keyboard shortcuts, mouse gestures are fully customizable, so you can tailor them any way you want.
