Title: Calculus I
Credit: 4-0-4
Textbook: Calculus (Early Transcendentals), by J. Stewart, $5^{\text {th }}$ edition, Thomson, 2003

Objectives: To introduce the student to basic concepts and methods of Calculus. Topics include: Limits and continuity of functions of a single variable. Differentiability. Exponential, Logarithmic, Hyperbolic, trigonometric and inverse trigonometric functions. Applications: Related rates, Local linear approximation, Differentials, Curve sketching and Applied optimization problems.

## Grading Policy

1. Exam I: $25 \%$ ( 100 points), a common written exam. It will be on Wednesday, Oet. 31, 2007. Tuesday, Nov. 6, 2007.
2. Exam II: $25 \%$ ( 100 points), a common multiple choice exam.. It will be on Wednesday, Dec. 5, 2007.
3. Class Work: $15 \%$ ( 60 points). It is based on quizzes (around 5 quizzes), homework, or other class activities determined by the instructor. Any quiz or test under class activity should be of written type and not of multiple choice type.
4. Final Exam: $35 \%$ (140 points), a comprehensive common multiple choice exam.

Class Work Average. The section average ( X ) of the Class Work out of 60 should satisfy

$$
X \in[36,45] .
$$

Exam Questions: The questions of the common exams are based on the examples, homework problems, recitation problems and the exercises of the textbook.

Missing an Exam: No makeup exam will be given under any circumstance. When a student misses Exam I or Exam II for a legitimate reason (such as medical emergencies), his grade for this exam will be determined based on his average performance. Further, the student must provide an official excuse within one week of the missed exam.

Attendance: A DN grade will be awarded to any student who accumulates 12 unexcused absences (lecture and recitation).

Academic Integrity: All KFUPM policies regarding ethics apply to this course.

# Math 101 Syllabus 

2007-2008 (071)
Coordinator: Dr. Mohammad Z. Abu-Sbeih

| Week | Date | Sec. | Topics |
| :---: | :---: | :---: | :---: |
| 1 | Sep. 8-12, 2007 | $\begin{aligned} & 2.1 \\ & 2.2 \\ & \hline \end{aligned}$ | The Tangent Problem: Example1. The Limit of a Function |
| 2 | Sep. 15-19 | $\begin{aligned} & 2.3 \\ & 2.4 \\ & \hline \end{aligned}$ | Calculating Limits Using the Limit Laws The Precise Definition of a Limit: Examples 1,2, and 3 |
| 3 | Sep. 22-26 | $\begin{aligned} & 2.5 \\ & 2.6 \\ & \hline \end{aligned}$ | Continuity <br> Limits at Infinity; Horizontal Asymptotes |
| Sunday, Sep. 23, 2007: National Holiday |  |  |  |
| 4 | Sep. 29- Oct. 3 | $\begin{aligned} & 2.7 \\ & 2.8 \end{aligned}$ | Tangents, Velocities, and Other Rates of Change Derivatives |
| Eid Al-Fitr Break: Oct. 4- Oct. 19, 2007 |  |  |  |
| 5 | Oct. 20-25* | $\begin{aligned} & 2.9 \\ & 3.1 \end{aligned}$ | The Derivative as a Function Derivatives of Polynomials and Exponential Functions |
| 6 | Oct. 27-31 | $\begin{aligned} & \hline 3.2 \\ & 3.3 \\ & \hline \end{aligned}$ | The Product and Quotient Rules Rate of Change in Physics: Example 1. |
| 7 | Nov. 3-7 | $\begin{aligned} & 3.4 \\ & 3.5 \end{aligned}$ | Derivatives of Trigonometric Functions The Chain Rule |
| Tuesday, Nov. 6, 2007: Exam I (25\%): 2.1-3.2 (A Written Exam) |  |  |  |
| 8 | Nov. 10-14 | $\begin{aligned} & 3.6 \\ & 3.7 \end{aligned}$ | Implicit Differentiation Higher Derivatives |
| 9 | Nov. 17-21 | $\begin{aligned} & 3.8 \\ & 3.9 \\ & \hline \end{aligned}$ | Derivatives of Logarithmic Functions Hyperbolic Functions |
| 10 | Nov. 24-28 | $\begin{gathered} \hline 3.9 \\ 3.10 \\ \hline \end{gathered}$ | Hyperbolic Functions Related Rates |
| 11 | Dec.1-5 | $\begin{aligned} & 3.10 \\ & 3.11 \\ & \hline \end{aligned}$ | Related Rates <br> Linear Approximations and Differentials |
| Wednesday, Dec. 5, 2007: Exam II (25\%): 3.3-3.10 (A Multiple Choice Exam) |  |  |  |
| 12 | Dec. 8-12 | $\begin{aligned} & 4.1 \\ & 4.2 \end{aligned}$ | Maximum and Minimum Values The Mean Value Theorem |
| Eid Al-Adha Break: Dec. 13-Dec. 28, 2007 |  |  |  |
| 13 | Dec. 29- Jan. 2 | $\begin{aligned} & 4.3 \\ & 4.4 \\ & \hline \end{aligned}$ | How Derivatives Affect the Shape of a Graph Indeterminate Forms and L'Hospital's Rule |
| 14 | Jan 5-9, 2008 | $\begin{aligned} & 4.5 \\ & 4.7 \end{aligned}$ | Summary of Curve Sketching Optimization Problems |
| 15 | Jan 12-16 | $\begin{gathered} \hline 4.9 \\ 4.10 \\ \hline \end{gathered}$ | Newton's Method Antiderivatives |
| Final Exam: A Comprehensive Multiple Choice Exam, Date is to be announced |  |  |  |

* CAS problems require the use of a technology tool (e.g., graphing calculators or computers). You are encouraged to do these problems in order to enhance your understanding of the concepts involved.

## Tips on how to enhance your problem-solving abilities:

1. Please do all the homework assignments on time.
2. You are urged to practice (but not memorize) more problems than the above lists.
3. You should always try to solve a problem on your own before reading the solution or asking for help.
4. If you find it difficult to handle a certain type of problems, you should try more problems of that type.
5. You should try the recitation problems before coming to class.
6. You are encouraged to solve some of the review problems at the end of each chapter.
7. The practice you get doing homework and reviewing the class lectures and recitations will make exam problems easier to tackle.
8. Try to make good use of the office hours of your instructor.

[^0]:    *: Thursday, October 25, 2007 is a Normal Class.
