(F) THE IMPACT OF OUR FOLLOWING STUDIES:

One of the most prominent contributions we made to the Radiation Protection as well as Environmental Protection was the two studies we completed for thorium radioactivity measurements of gas mantles imported to the Kingdom. This study was the first of this type conducted in the Kingdom. The title and authors of the two papers are:

"Measurements of thorium content and radioactivity in gas mantles"

A. Aksoy, M. Jarallah and F. Abu-Jarad
The Arabian Journal for Science and Engineering,
Vol. 22, No. 1A (1997) 25-35

AND

"Chemical analysis of thorium content in gas mantles"

M. Al-Jarallah, A.R. Al-Arfaj, A. Aksoy, and F. Abu-Jarad
The Arabian Journal for Science and Engineering
Vol. 23, No. 1A (1998) 17-21

The impact of the study was very important and fruitful: The study results in setting a **standard limit of radioactivity for the gas mantles to be imported to the Kingdom.** The work was emphasized by the Custodian of the two holy mosques, **His Royal Highness King Abdullah Bin Abdulaziz** and was also mentioned and praised by the **H.E. the Ministry of High Education** as well as **The Vice Rector for Applied Research, KFUPM.** The work has been published in a local journal and magazine.

(COPIES OF THE RELATED PAPERS ARE AVAILABLE UPON REQUEST)

(G) CONSULTING WORK AND COLLABORATION IN THE KINGDOM
