

A lupenediol from Euonymus revolutus. Kumar, N. Savitri; Muthukuda, P. Mangala; Wazeer, Mohamed I. M.. Dep. Chem., Univ. Peradeniya, Peradeniya, Sri Lanka. Phytochemistry (Elsevier) (1985), 24(6), 1337-40.

Abstract

A new lupane deriv. isolated from *E. revolutus* (Celastraceae) was established to be $2\alpha,3\alpha$ -dihydroxy-lup-20(29)-en-28-oic acid (I) on the basis of chem. interconversions and spectroscopic data.
