ICS334 Quiz #5

Time: 15 Minutes

ID_____

Name: _____

1. Explain how the insertion of new records is done in a table organized as heap.

2. When would you prefer a heap file organization than a B+ tree organization for a table?

3. A table organized as hash occupies 1000 disk blocks. How many of these 1000 disk blocks are data blocks and how many of them are index blocks?
