

Design and Implementation of Programming Languages

Literature Survey

Due Oct. 3, 2005

You are asked to do a literature survey on a topic related to “*Language Design and Implementation issues*”. These issues are many, you are asked to choose one and search the literature for five papers on the same topic. Papers must be dated 2000 or later and must be in a reputable Journal or a conference and in English.

Deliverables:

Title Page

Introduction about the importance and reasons for selecting the topic

A description of the problem or the issue

Summary of five papers (one page each)

Future directions for this issue

Conclusions
