

Seminar

Dept of Mathematics and Statistics King Fahd University of Petroleum and Minerals

Presenter	Dr. Abdul Kadir Hussein Dept of Mathematics and Statistics KFUPM
Title	"Do not Kill your Children!": A Canadian Survey on Car-Seat Use, Designs and Methods
Topic & (Level)	Survey Analysis (Applied, Methodological)
Audience	All KFUPM community are cordially Invited
Date	Sunday, Dec 27 2009
Time	12:30 PM - 1:30 PM
Location	Building 5, Smart Classroom # 201

Abstract

One of the major causes of death and serious injuries in children under age 14 is trauma due to road crashes. To protect children in vehicles, one needs to use the correct car seats for the child's height weight and age. In this talk, I will discuss the design and some aspects of the statistical estimation used in a Canadian national survey which measured the correct use of car seats in vehicl es traveling on Canadian roads. The floor will open for discussion, lessons lea rned, and suggested for future improvement.

Tea and Coffee will be served
