

Physics 102-Rec  
 Quiz#7-Sect.22  
 Chapter 24

Instructor: Dr. A. Mekki

Name: Key Id: \_\_\_\_\_

Two protons are initially far away. Each proton is moving toward the other one with a speed of 300 m/s each. Find the closest distance they can get to each other.

initial

$$\Delta K + \Delta U = 0$$

$$\Delta K = - \Delta U$$

$$K_f - K_i = - (U_f - U_i)$$

$$0 - 2 \left( \frac{1}{2} m v^2 \right) = - \left( \frac{k q^2}{d} - 0 \right)$$

$$m v^2 = \frac{k q^2}{d}$$

$$\Rightarrow d = \frac{k q^2}{m v^2} = \frac{9 \times 10^9 \times (1.6 \times 10^{-19})^2}{1.67 \times 10^{-27} \times (300)^2}$$

$$d = 1.5 \times 10^{-6} \text{ m}$$

$$d = 1.5 \text{ } \mu\text{m}$$
